

Badotherm three valve manifold model BDTM932 can be used for isolation, bleeding, calibration, and testing of differential pressure instruments. The BDTM932 manifold has an instrument connection with rotating nuts on the top. All Badotherm valves are standard stainless steel and optional available in exotic materials, such as Hastelloy and Monel. This valve has a non-rotatable conical tip to ensure perfect alignment. Badotherm valves are manufactured within the European Union.
