# BDT20 – Safety process pressure gauge 63mm

#### **Product description**

Badotherm pressure gauge model BDT20 63mm is the solid front, safety pattern gauge according the highest class of the EN 837-1 / 9.7.2 and ANSI B 40.1. The BDT20 stainless steel safety gauge has a solid front baffle wall and a pressure relieve back. This pressure gauge is typically used for applications in the chemical, petrochemical, and oil & gas industry or anywhere where safety comes first. These gauges are designed to withstand the severest of operating conditions created by the ambient environment and the process medium

**BADOTHERM®** 

## **Design standard**

EN837-1

#### Dial sizes, ranges & accuracy

Possibilities in ranges and accuracies are led by the dial size Accuracy class is based on dry gauges. Liquid filling can affect the accuracy.

Dial size	Ranges	Accuracy
63mm	01 to 01000 bar	1.6%

#### **Mounting variation**

Not all gauges are suitable for some mounting variations. For the BDT18 series the mounting variations are below.

- type A (10) bottom connection, direct mounting
- type D (30) lower back connection, direct mounting
- **type E** (32) lower back connection, panel mounting (front)

#### More specifically per dial size:

Dial size	А	В	С	D	E	F
63mm	•			•	•	

#### **Process connection**

Dial size	Standard thread	optionally	SW size
63mm	G 1/4 B or 1/4 " NPT	1/8"	14mm

Other thread standards such as ISO 7-1 R (BSPT), or DIN 13-1 (Metric) can be selected as well.

-> See datasheet "thread information" for specific thread details

## **Materials of construction**

	BDT20	BDT20M				
Case	AISI 304					
Bezel	AISI 304					
Connection <sup>1</sup>	AISI 316	Alloy 400				
Sensing element <sup>1</sup>	TP316 Alloy 400					
Movement	Stainless steel					
Pointer	Aluminium					
Dial	Aummum					
Window gasket	N	IBR				
Blow out	NDR					
Fill plug	NBR (HNBR for filled gauges)					
Mounting flanges	AISI 304					
Window Laminated safety glass						
*1 wetted materials						

## **Pressure limitations**

The gauge are built to withstand harsh environments however the EN 837 limits the use of a pressure gauge according below table.

Dial size	Steady	Fluctuating	Short time
63mm	0.75 x FSV	0.67 x FSV	FSV
FSV: full scale value			

## **Temperature limitations**

The gauges can withstand ambient and process temperature up to a certain limit. The limitations on temperature are:

	Ambient	Medium
Dry	-40°C+60°C	-40°C+200°C
Filled	-20°C+60°C	-20°C+90°C

The variation of indication caused by the effect of temperature shall not exceed:  $\pm 0.4\% / 10K$  FSV

## Window

Standard BDT20 63mm gauge has a laminated safety window.

#### Pointer

Standard pointer is a fixed black painted aluminum pointer. The optional pointer is an adjustable slotted pointer

#### **Dial facing**

The dial plate is made from aluminum and coated with UV resistant white coating. The black dial markings, scale, numbering, and interval is according the EN 837. Options like colored dial, customer logo, or colored segments are possible as well. Scale interval and numbering is following the EN837.

#### Limit stop

To prevent permanent damage after overpressure, or sudden vacuum the gauge is protected by a stop pin on the dial.

## **Degree of protection**

The BDT20 has a standard degree of protection of IP65. The values are determined according the IEC/EN 60529.

# **Case filling**

The gauges can be filled with different kind of fill fluids. The fill fluids available are:

- BPF01 Glycerine 86%
- BPF02 Silicon
- BPF04 Foaming service
- BPF05 ECTFE inert fluid for oxygen service
- BPF06 Glycerine 99.5%

#### **Restrictor Screw**

All gauges can be executed with a restrictor of 0.8 orifice in AISI316(L).

#### **Special service**

The gauges can be supplied cleaned for oxygen use. This means the gauge is assembled and tested in a special area free of oil. The gauges are individually packed in a plastic bag with marking. The symbol:

# **Certification & Declaration**

#### Calibration

Gauges are full range calibrated as a factory standard. Optionally you can select a 5 points calibration certificate.

#### Pressure Equipment Directive - 2014\_68\_EU

PED approval is given according article 3.3 and is valid for ranges >200 bar. All gauges will be marked accordingly. A declaration of conformity can be supplied.

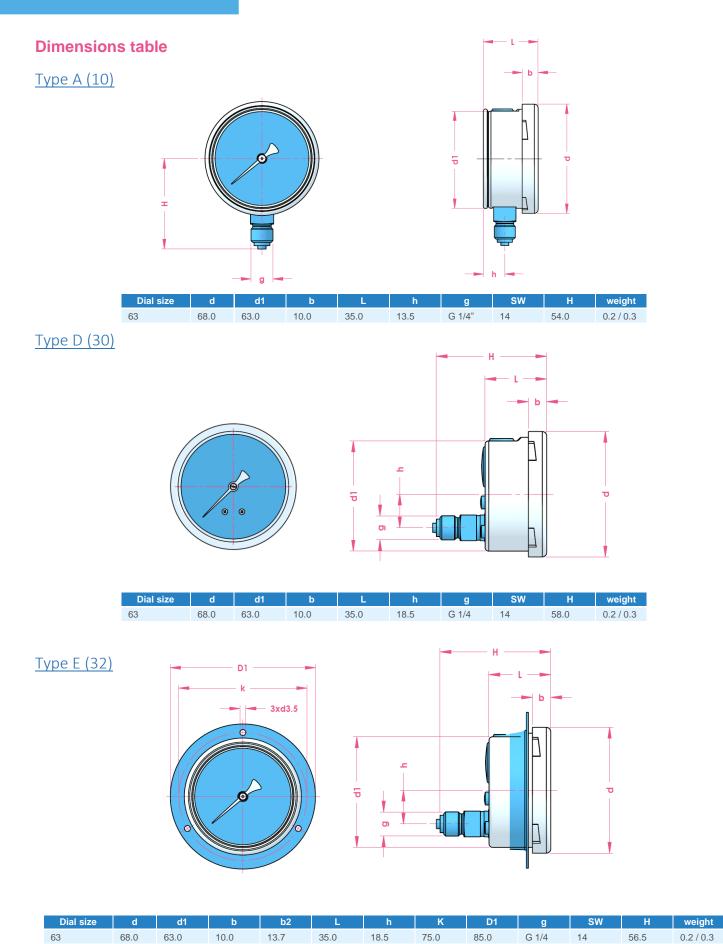

#### ATEX 114 - 2014/68/EU

ATEX restrictions are explained in the IOM and in the ATEX background datasheet.

EN 10204 material certificate

A material 3.1 certificate on the wetted parts can be supplied.
