

BDT21 – Solid front process pressure gauge 125mm

Product description

Badotherm pressure gauge model BDT21 is the solid front, safety pattern gauges according to the operational safety requirements of AMSE B40.100 and ANSI B 40.1.1. The BDT21 stainless steel safety gauge with phenolic casing has a solid front baffle wall and a full blow-out back. This pressure gauge is typically used for applications in the chemical, petro-chemical, and oil & gas industry or anywhere where safety comes first. These gauges are designed to withstand the severest of operating conditions created by the ambient environment and the process medium.

Design standard

ASME B40.100

Dial sizes, ranges & accuracy

The BDT21 is a 125mm case with a standard accuracy of 1.0%. Accuracy class is based on dry gauges. Liquid filling may affect the accuracy.

Dial size	Ranges	Accuracy
125mm	0...1 to 0...1600	1.0%

Mounting variation

Not all gauges are suitable for some mounting variations. For the BDT21 series the mounting variations are below.

- **type A** (10) bottom connection, direct mounting
- **type C** (11) bottom connection, surface mounting (back)

More specifically per dial size:

Dial size	A	C	D	E
125mm	•	•		

Process connection

Dial size	Standard thread	optionally	SW size
125mm	G ½ A or ½" NPT	1/4", 3/8"	17mm

Other thread standards such as ISO 7-1 R (BSPT), or DIN 13-1 (M20x1.5) can be selected as well.

-> See datasheet "thread information" for specific thread details

Materials of construction

	BDT21	BDT21...M
Case	black ASA+PC	
Bezel	black ASA+PC	
Connection ¹	AISI 316	Alloy 400
Sensing element ¹	AISI 316	Alloy 400
Movement	Stainless steel	
Pointer	Aluminium	
Dial	Aluminium	
Window gasket	AISI 304	
Blow out	AISI 304	
Fill plug	NBR (HNBR for filled gauges)	
Window	Laminated safety glass	

*1 wetted materials

Pressure limitations

The gauge are built to withstand harsh environments however the ASME B40.100 limits the use of a pressure gauge according below table.

Dial size	Steady	Fluctuating	Short time
125mm	FSV	0.9 x FSV	1.3 x FSV

FSV: full scale value

Temperature limitations

The gauges can withstand ambient and process temperature up to a certain limit. The limitations on temperature are:

	Ambient	Medium
Dry case	-40°C ...+60°C	-40°C...+200°C
Filled case	-20°C ...+60°C	-20°C...+90°C

The variation of indication caused by the effect of temperature shall not exceed: $\pm 0.4\% / 10K FSV$

Window

Standard BDT21 gauges have a laminated safety glass window.

Pointer

Standard pointer is an adjustable black painted aluminum pointer. Optional a micro adjustable pointer can be selected.

Dial facing

The dial plate is made from aluminum and coated with UV resistant white coating. The black dial markings, scale, numbering, and interval is according the ASME B40.100. Options like colored dial, customer logo, or colored segments are possible as well. Scale interval and numbering is following the ASME B40.100.

Limit stop

To prevent permanent damage after overpressure, or sudden vacuum the gauge is protected by an internal limit stop on the movement that is set just below the minimum scale value and just outside the 130% maximum scale value. These gauges also have a free zero.

Degree of protection

The BDT21 has a standard degree of protection of IP65. The values are determined according the IEC/EN 60529.

Add-on contacts

The BDT21 is a safety pressure gauge and does not allow the use of an add-on contact due to the Makrolon material that is splintering.

Case filling

The gauges can be filled with different kind of fill fluids. The fill fluids available are:

- BPF01 - Glycerine 86%
- BPF02 - Silicon
- BPF03 - Silicon for contacts
- BPF04 - Mineral oil (Foaming service)
- BPF05 - Halocarbon (inert fluid for oxygen service)
- BPF06 - Glycerine 99.5%

Restrictor Screw

All gauges can be executed with a restrictor of 0.8 or 0.3 orifice in AISI316. For the Alloy 400 internal the orifice is 0.8mm.

Special service

The gauges can be supplied cleaned for oxygen use. This means the gauge is assembled and tested in a special area free of oil. The gauges are individually packed in a plastic bag with marking. The symbol used is:

Certification & Declaration

Calibration

Gauges are full range calibrated as a factory standard. Optionally you can select a 5 points calibration certificate, and a 10 points calibration certificate for the 0.6% and 0.5% gauges.

Pressure Equipment Directive - 2014_68_EU

PED approval is given according article 3.3 and is valid for ranges >200 bar. All gauges will be marked accordingly. A declaration of conformity can be supplied.

ATEX 114 - 2014/68/EU

ATEX restrictions are explained in the IOM and in the ATEX background datasheet.

EN 10204 material certificate

A material 3.1 certificate on the wetted parts can be supplied.

Dimensions table
